

mSERIES POS PRINTERS

Innovative Thermal Receipt
Printers for Retail and Hospitality

Innovative Solutions for Your Business

Epson's mSeries thermal receipt printers deliver robust connectivity in a sleek, compact, modern design. Engineered to meet the demands of even the busiest retail and hospitality environments, these powerful printers offer multi-interface options, including USB, Ethernet, Serial, Bluetooth® and wireless, and select models allow connections up to four POS peripheral devices.

Compact. Versatile. Powerful.

How They Work

Designed exclusively for today's advanced environments, these cutting-edge, single-station thermal receipt printers easily connect to traditional and mobile POS systems.

All models are available in black or white and feature interchangeable covers so you can choose between top or front load configurations.

OmniLink® Intelligent Technologies

OmniLink technology is available in the mSeries family of products*: Embedded Server Direct Print technology enables mSeries printers to retrieve data from the Internet, so you can provide online ordering to your customers. mSeries OmniLink models** also offer the ability to charge smart devices and communicate data¹ using a single USB cable. Plus, USB-Network-Tethering² (available on select models) provides stable wired network connectivity from the printer to a tablet, eliminating potential Wi-Fi connection dropouts, so orders can be processed more effectively and efficiently.

* Only select mSeries products are OmniLink, the m30ll and m10 are not.

** Only select m50 Bluetooth model features the Charge, Data Communication and USB-Network-Tethering feature.
