

One SIM

Multiple Networks. Ubiquitous Coverage.

SmartSIM[™]

Advantix SmartSIM[™] connects SIM-enabled hardware devices – tablets, handheld computers, laptops, IoT devices, and more – to hundreds of cellular networks worldwide via intelligent carrier switching – and it's Always ON.

If your connection drops, your device will automatically failover by connecting to the next available carrier, ensuring business as usual without losing revenue or productivity.

Many multicarrier SIM solutions have different capabilities and features. Some require over-the-air (OTA) updates before your device can switch carriers, forcing you to load and remove profiles. Some constantly roam carrier networks or consistently scan the device for the best signal. Others have limited network paths, which impacts failover, or they have limited network layer control. **SmartSIM is different.**

True Auto-Failover

No manual intervention, changing profiles, or rebooting your device

Multi-IMSI Network

Allows granular management with additional failover options

IMS Platform

Supports IP multimedia services, including VoLTE and SMS text messaging

Superior Security

Includes DPI at the network layer to apply virus, malware, and content filtering

Network Tuning

Enhanced network troubleshooting and fast over-the-air (OTA) updates

POC Testing

A POC program that proves carrier switching and application success

Amazing Analytics

Superior real-time network analytics, including carrier switching data

Unrivaled Support

A massive support structure staffed with experienced, responsive teams

Your Connectivity Insurance Policy

Network outages, congested cell towers, and dead zones in rural areas can disrupt cellular connectivity. SmartSIM is designed to overcome these challenges. It's like a continuous connectivity insurance policy for fleets and teams in the field and the ultimate wireless backup solution for inside the four walls.

SmartSIM value stack

SmartSIM

- One intelligent SIM for global coverage
- Auto-failover with seamless switching between mobile networks
- Ubiquitous coverage, including countries with roaming restrictions

Groov Platform

- Simplifies SIM and data plan management
- Enables proactive optimization of usage
- Real-time data on network performance and carrier switching

Global NOC

- Monitoring of carrier networks worldwide
- Constant testing of network paths for optimal performance
- 24/7/365 trouble-resolution hotline/services

Mobile Network Operators

- 600+ network providers including AT&T, Verizon and T-Mobile
- 4G/LTE in 160+ countries
- 5G coverage in 48 countries

Core Network

- Fully redundant global IP network supporting 4G/LTE and 5G where available
- Direct network access for better control and SIM management
- Data centers in the U.S., Amsterdam, Hong Kong and Singapore

SmartSIM supports hundreds of mobile hardware devices from leading OEMs.

FAQ

WHAT ARE THE AVAILABLE DATA RATE PLANS?

Standard plans include 50MB, 250MB, 500MB, 1GB, 2GB, 3GB, 5GB, 10GB, 20GB and larger plans.

CAN YOU POOL DATA PLANS?

Yes, each device requires a plan. Plans can be pooled with each other to offer a “buffer” to overages on the overall account.

IS A TERM CONTRACT REQUIRED?

No. Only a deposit of one month’s recurring charges, subject to forfeiture if the line is canceled within 12 months.

ARE THERE ACTIVATION FEES?

Yes. There is a one-time fee for SIM activation and account setup.

IS THIS FOR DATA ONLY?

Yes, the SmartSIM solution is for data only applications. If voice/text is required, Advantix has other options.

IS THERE SUPPORT?

Yes. Advantix has experts on staff to support you and make sure you are getting the most out of the solution.
