

## Eaton's work from anywhere solutions

# Powering productivity at home

**Your home office is more than just a place to work—it's where inspiration meets innovation, and dreams become reality.** How you create that space – and the products that go into it – can either help you find your flow or stop productivity at the door.

Whether you are setting up a home office for the first time or looking to upgrade your existing workspace, it's important to find the right products that fit your specific requirements. Eaton's wide portfolio of ready-to-ship products means you can have the workspace of your dreams in this quarter, not the next.

### Save time

- Equip your office without waiting thanks to a large inventory of ready to ship products
- Improve screen real estate by using a docking station to connect laptops to large monitors

### Save money

- Keep racking up billable hours through an outage by backing up computers and Wi-Fi routers with plug-and-play tower UPSs
- Adjustable height workstations and monitor mounts means only buying one desk

### Reduce risk

- Protect expensive equipment from damage with desktop surge protectors
- When working from anywhere, avoid the hunt for an outlet — or the risk of a dead battery — with portable chargers
