

Eaton's retail solutions

In-store technology is the new frontier for retail

As the boundaries between physical and digital commerce blur, it is crucial for retail stores to evolve beyond mere spaces to stock and merchandise products. With the rise of hybrid technology enhanced shopping experiences, protecting Point of Sale (POS) systems becomes paramount. These systems play a

critical role in capturing, accessing and analyzing customer data in real time. POS systems act as the backbone of retail operations. By investing in fast and reliable on-premise infrastructure, retail stores can foster trust with their customers and ensure this critical equipment remains function for a smooth shopping experience.

Save time

- By including charging solutions in the retail space, retailers can ensure seamless customer experiences by keeping mobile devices, such as smartphones and tablets, fully charged and ready for use throughout the day

Save money

- Eaton's wide range of products for retail facilities simplifies ordering and managing
- Adjustable height workstations and monitor mounts means only buying one desk

Reduce risk

- Protect expensive POS equipment from damage with UPS systems designed for the retail space
- Protect personnel, data and systems with secure technology
